Targus® 4Vu™ Privacy Screen for 24" Widescreen Monitors (16:9)

The Targus® 24-inch Monitor Privacy Screen is designed to fit 24-inch widescreen LCD monitors with 16:9 ratio screens. To protect your information, tiny vertical blinds on the surface of the Privacy Screen narrow the viewing angle so data is only visible directly in front of the monitor up to 30 degrees away from the centre of the screen. Onlookers will only see a dark unclear screen when attempting to view the information from a side angle. In addition to providing security, the screen also blocks the glare to help reduce eye strain. The Privacy Screen can be easily attached by using clear adhesive strips designed for LCD filters or with the included tab guides that stick to the edge of the LCD bezel to hold the screen in place or with the patent-pending under-bezel tabs that keep the Privacy Screen flush against the monitor's screen for optimal viewing performance. Users can position the tabs so the screen easily slides on and off. Highly portable and easy to use, the Targus® Privacy Screen prevents onlookers from seeing valuable information often viewed on a LCD monitor in a modern open office.

- Protects private information with constrained viewing angles to 30° from either side
- Filters up to 40% of blue light, reducing the potential of sleep deprivation led fatigue
- Anti-reflective coating blocks screen glare for a comfortable viewing experience
- Over 12% brighter than competitive solutions for greater clarity and visibility
- Glossy or matte sides to suit your viewing preferences
- Reusable silicon adhesive strips for quick and easy installation
- 2 Year Limited Warranty

Suited for Workplace or Personal Use
One study found that employees are 50% less productive when their visual privacy is at risk, and that two in three employees expose sensitive data outside the workplace¹.

With more of us working in open office settings, on-the-go, or in unsecured environments, visual privacy is a critical consideration for employers and employees alike. Privacy screens add a layer of protection that encourages productivity at the same time it protects confidential information.

30° Viewing Angle
Even in public places like hotel lobbies, airplanes, or cafes, the 4Vu™ Privacy Screen keeps your data safe from prying eyes. Your content is visible only to the person directly in front of the screen and up to 30° on either side. You have full clarity and visibility, while onlookers or passersby see only a black screen.

Reduced Glare, Even in Bright Rooms
Our anti-reflective coating reduces glare and improves light transmittance under most viewing conditions. The result is brightness that's up to 12.4% higher than competitive privacy screens for comfortable, clear views.

Easy Installation Options
The 4Vu™ Privacy Screen comes with reusable silicon adhesive strips and tab guides so you can quickly and easily attach the screen directly to your display.

Blue Light Filtering
Whilst blue light is all around us, too much screen time can lead to increased exposure of artificial blue light, which disrupts the natural stimulation to our brain from diurnal cycle, leading to potential of 'digital eye strain' short term and sleep deprivation led fatigue long term. The 4Vu™ Privacy Screen filters blue light to reduce eye strain and minimize the potentially harmful effects on your vision.
